

A photograph of a young child with blonde hair, wearing a dark jacket, driving a yellow toy car with large black wheels. The car is moving through a garden with green foliage and orange flowers. The background shows a wooden fence and a brick house. The overall scene is bright and sunny.

ROAMOBILE®

America's Newest Recreational Vehicle Idea!

**IT GOES
EVERYWHERE!**

6x6World.com

ROAMMOBILE®

it's sweeping the country!

Climb aboard the Roamobile . . . and head for excitement! Kids of all ages are wild about this amazing four-wheel drive vehicle that goes through sand, snow, grass, fields . . . over asphalt and dirt . . . just about anywhere, any time of the year. The Roamobile is so versatile, it even pulls wagons . . . climbs 30° grades with the greatest of ease.

The Roamobile is more than just a toy. It's a whole new concept in recreational vehicles. In fact, it's the first recreational vehicle that can be used effectively in back yards. It can make a complete 360° turn in its own diameter . . . without digging up the sod! The Roamobile features a rigid, unitized steel frame and a body of incredibly strong high-impact plastic. Teens and pre-teens can really have a ball with the Roamobile . . . yet it's so sturdy and easy to operate that younger children of five or six can safely use it. Roamobile comes in several bright, permanent colors . . . runs on ordinary gas and oil . . . and can be customized with a wide assortment of accessories. It comes completely assembled . . . just add gas and oil and it's ready to start!

The Roamobile offers years of fun and excitement for the whole family. It's the recreational vehicle of the future . . . now!

ENGINEERING SPECIFICATIONS

WEIGHT: 120 lbs.

DIMENSIONS: 58" long x 31" wide x 20" high

CONSTRUCTION: High impact vacuum formed ABS plastic with unitized steel frame.

ENGINE: "Easy-start" 2 H.P. Briggs & Stratton

SPEED CAPACITY: 8-10 mph. (approx. 18-20 mph. with Hop-Up Kit)

DRIVE MECHANISM: Twin control levers actuate two independent clutch drives which are connected to two independent chains, each of which control two wheels on each side, giving the Roamobile 4-wheel drive. Two 4:1 chain reduction drives give a total gear ratio of 16:1 delivering an effective 25 H.P. to the wheels.

TIRES: Deep tread "Polygrass" high density (linear Polyethylene) 12" diameter x 7.5" width.

WEIGHT TOLERANCE: Up to 150 lbs.

COLORS: Big Bad Green, Banana Yellow, Roadrunner Red

PACKING: Shipped completely assembled.

OPERATION

Twin independent right/left hand levers control the Roamobile's operation. Pushing forward on both levers initiates forward motion. Pulling back on the twin levers brakes the vehicle. The Roamobile is turned in any direction by using one lever in opposition to the other, thus turning in the direction of the braking lever. As an added safety feature, when control levers are released, they automatically return to neutral position, thus cutting off all power to the drive train. A variable hand throttle controls the desired speed.

GUARANTEES AND SERVICING

Motor is guaranteed for one year by Briggs & Stratton. Servicing available at over 15,000 Briggs & Stratton Service Centers world wide.

Warranty: 3 months

ACCESSORIES

These accessories are presently available for customizing the Roamobile . . .

- Decal Kit (Bumble Bee Stripe Design as pictured above) • Gas Gauge • Oil Minder Gauge
- Hop-Up Kit (boosts maximum speed to 18-20 mph.) • Winter Snow Kit (6 wheel drive conversion kit and vacuum formed sled belly pan.)

Any or all of these special accessories can be added to the basic Roamobile to give it a highly personalized custom look.
